CORE SKILLS

Backend and web: PHP 8, CodeIgniter, MySQL, REST APIs, JavaScript, HTML, CSS.

Product delivery: requirements gathering, MVP planning, feature breakdown, workflow design, testing, deployment, documentation, onboarding, and support.

Integrations and operations: payment gateways, hosting, deployment, troubleshooting, Git, and GitHub.

Additional working experience: C#/.NET, Kotlin, Flutter integrations, WordPress, Bootstrap, and Tailwind CSS.

PROFILE

Lagos-based technology generalist with 9+ years in software and product work. I help teams move from an idea to working software, launch, and ongoing user support. My primary tools are PHP, CodeIgniter, and MySQL, with experience across product planning, APIs, integrations, deployment, documentation, and user communication.

EXPERIENCE

AJWORLDTECH | Technology Generalist and Full-Stack Developer

2014 - Present

Build and maintain web applications and backend features for education, billing, business, and communication products. Develop APIs, database structures, workflows, and integrations. Contribute across requirements, feature planning, implementation, testing, deployment, troubleshooting, and user support.

Ebunoluwa International School | ICT and Backend Solutions

2021 - 2023

Designed and managed a computer-based testing backend used by more than 100 students, supporting exam processing, server performance, student data, and reporting workflows.

MTN Nigeria | Marketing Representative

January 2024 - Present

Support customer-facing marketing, product communication, and outreach. Understand customer needs and explain technology-enabled services.

Independent Development | Freelance Developer

2018 - Present

Deliver backend-driven applications using PHP and C#. Build APIs that support Flutter and Kotlin mobile applications and maintain backend-focused GitHub repositories.

COMMUNICATION

Practical experience in social media management, content planning and scheduling, brand-page management, publishing, community engagement, campaign coordination, and digital marketing. Support product communication, explain features to users, and connect customer-facing feedback with product teams.

FEATURED PRODUCTS

BillChamp | Billing and business-management SaaS

billchamp.ajworldtech.com

Supports invoices, receipts, proformas, payment tracking, reminders, recurring invoices, inventory and POS workflows, waybill tracking, reports, and payment integrations.

Contribution: product planning and delivery, PHP backend and web development, database and workflow design, integrations, deployment, and ongoing improvements.

Outcome: more than NGN 43.3 million in invoices processed; used by 8+ businesses.

CodeChamp | Coding and STEM learning for schools

codechamp.ajworldtech.com

Supports school, teacher, student, and parent workflows, coding lessons, enrollment, term access, and coupon-based payment features.

Contribution: platform development, feature planning, school onboarding, payment-related features, deployment, and user support.

Outcome: approximately 180 students across two schools in an early four-month period.

FreeMeet | Browser-based meetings

freemeet.ajworldtech.com

Room creation and joining, guest access, device preview, participant controls, messaging, and real-time meeting functionality.

Contribution: web product and backend foundations, the journey from room creation through participation, and responsive meeting controls.
